All figures are as of 30th September, 2024

HIGHLIGHTS

- NIFTY 50 & BSE SENSEX gained 1800.25 and 5,267.05 points respectively in the second Quarter of FY 24-25. The S&P BSE indices like Healthcare (+19.20%), FMCG (+15.76%), Consumer Durables (+15.02%) and Tech (+14.71%) were major gainers.
- The Indian stock market witnessed robust growth in the second quarter, driven by sustained investor confidence in the country's economic prospects. Key benchmark indices reached new all-time highs, fueled by strong performance in sectors such as media and banking.
- The recent monetary policy reviews by the US Federal Reserve (Fed), European Central Bank (ECB), and Bank of Japan (BoJ) were key events that significantly impacted global financial markets. However, China's recent stimulus announcement resulted in some capital outflows from domestic markets. After underperforming against emerging markets (EM) such as Taiwan, India, and South Korea over the past 10 months, China is now reemerging as a leading EM destination.
- In the upcoming quarter, important events to monitor include the progression of corporate earnings, the results of state elections in Maharashtra and trends during the festive season. On a global scale, in addition to actions by the Fed, the outcome of the US Presidential elections and forthcoming macro data from the US will also be significant. Additionally, inflation has been easing globally as developed countries have begun their rate-cutting cycles. India's nominal GDP growth rate is expected to be low double digits going forward.

Debt Market

FIXED INCOME

- The medium-term outlook for debt markets remains positive, with the US Fed initiating its rate easing cycle. Most major central banks have cut rates in 2024, except Japan, which has raised rates. The RBI may adopt a softer stance on inflation, drawing comfort from a healthy monsoon and strong sowing trends, along with declining commodity prices. A broadening global monetary policy cycle should also benefit margins.
- Indian bond yields continued to decline in September, influenced by a gradual drop in global yields and crude oil prices. The 10-year Indian benchmark yield fell by approximately 13 basis points, while the 5-year yield decreased by about 8 basis points.
- FPIs are actively investing in Indian sovereign securities following the country's inclusion in the JP Morgan Index, which is expected to increase demand for Indian sovereign debt globally. Additionally, domestic demand from long-term investors remains strong, particularly for PSU bonds.
- India's CPI remained below 4%, printing 3.65% for August 24. FII debt flows remained positive in September, though it slowed down a bit, probably with investors awaiting US FOMC decision. With inflation on a downward trajectory, the RBI is anticipated to initiate a rate-cutting cycle by December 2024 or February 2025. Overall, we expect bond yields to trend down to around 6.0-6.5% over the next 9 to 12 months.

HIGHLIGHTS

- The Indian rupee depreciated toward 83.79 per USD. The REER, which measures the value of a currency against a basket of trading partners' currencies, has risen to 107.35 from 102 in 2022-23 and 103 in 2023-24. To manage the REER and maintain currency competitiveness, the Reserve Bank of India (RBI) may have allowed the INR to depreciate to some extent. This strategic decision helps to balance trade competitiveness and inflationary pressures.
- Another reason for the fall could be the government's huge defense purchases, oil imports, and stake sales by many companies seeking hefty valuations.
